## A WORD FROM THE SPONSOR

Following the dreadful Foot & Mouth disease last year and, the resented one-year break in the continuity of the SLMM, this compelled us to hold the 24th SLMM, in this, the 25th Year of its inception.

So! I confess to experiencing some trepidation when the day finally arrived. However, I am pleased to say that my worries were completely groundless, my comment is supported by the many competitors who took the time to communicate with me by letter 'phone and e-mail. I thank you for your kind comments.

The organisation now has the experience to anticipate and overcome most problems before they occur. So thanks again to Martin, Charlotte, Alan, Wilf and their teams. Also to daughter Carolyn and Joanne for their appreciated and important contributions to the event.

To compensate for the missing year, some routes were perhaps a little cautious, but I feel that you may agree this years courses must be rated to be amongst the best. I hope that the superb views did not detract too much from your timings.

To avoid some of the confusion that I experienced last year, would you kindly ensure that that applications to enter next years event be accompanied with clearly addressed stamped envelopes to take the size of this booklet, and that we are notified of any changes of address before the 1st June 2003.

May I respectfully advise you that: on your behalf, expenses commence to be incurred early during the year. Cancellations for full refunds should reach us by the third week in May to avoid further cost. We have a number of unclaimed medals for winners of past events. Those who are eligible should claim these before they disappear in the mist of time.

Last minute team and class changes should be made when checking in at reception. Thank you for your continued support for this important event, I hope that you found it to be rewarding.

# GALAXY

This superb lightweight tunnel tent weighs in at 3.0kg to offer a remarkable weight/space ratio. The flysheet has two very large bells with entrances at each end. The inner has near vertical end walls which gives a larger cubic capacity to reduce condensation. Packed size: 48 x 13cm.

**WHILST STOCKS LAST**

In response to popular demand we have now introduced Mark II versions of our SPACEPACKER (weight: 2.4kgs) SPACEPACKER PLUS (weight 2.75kgs) and GALAXY (weight:3kgs) tents, and these Mark II versions will be dispatched against all orders, unless otherwise requested. The new models are a little heavier to accommodate the following changes:

Quick release fittings that connect the inner to the outer to enable them to be pitched together, plus other fittings for "flysheet first" and "no crawl" pitching alternative.

An extra 0.3 sq. mtrs. of extra space in each of the two bells

Pockets outside each end of the inner which are accessible from within

Two hanging loops plus linkage between fly pull-outs and the inner tent

Shock corded pegging loops for greater reliability against U.V.deterioration, - a 50 denier lightweight ripstop polyester seam-sealed flysheet.

For those who do not wish to accommodate the modest additional weight, we confirm that the original versions will continue to be available.
